

REOPENING OCCUPANCY CALCULATIONS

PHASE 3

RESTAURANTS

FIXED SEATING

- The occupant load equals the number of seats. Divide the total number of seats by 2 for 50% occupancy.

MOVABLE SEATING

- Each occupant is allotted 15 square feet. To calculate 50% occupancy, divide the square foot area by 30.

RETAIL

RETAIL FLOOR

- Retail areas on the same level as the means of egress allow for 30 square feet per occupant. To calculate 50% occupancy, divide the square foot area by 60.

STORAGE and STOCK ROOMS

- Each occupant is allotted 300 square feet. To calculate 50% occupancy, divide the square foot area by 600.

ASSEMBLY

FIXED SEATS

- The occupant load equals the number of seats. Divide the total number of seats by 2 for 50%.

BENCH SEATS or PEWS

- Each occupant is allotted 18 inches of seating per person. To calculate 50% occupancy, allow 36" of seating length per person.
